HADAR ACOBAS

F R O N T - E N D
D E V E L O P E R

hadaracobas.github.io/resume

SUMMARY

I am a front-end developer with skills in HTML, CSS, Sass, JavaScript, React and more.

My main target is to write codes that are easy to read, consistent, reliable, as well as maintainable.

What makes me a strong candidate for a position in your company?

I am a good self-learner, hungry for success, a creative mind who can think outside the box, a great team player, not shy to take on responsibility and also confident to lead a team. And, what I consider most important, I never give up until my tasks are completed.

If I had to answer the question why I would want to work as a web developer, the answer is for the feeling I have when I manage to solve a problem after facing a challenge.

I'd welcome the opportunity to speak with you if you feel I'd be a good fit for a front-end development position in your company.
